Professional Experience

ImagineSoftware — Mar 2025 – May 2026

AI Specialist — Product Analysis, Business Systems & Automation — *Charlotte, NC*

- Served as a primary owner for AI-enabled reporting, document intelligence, knowledge retrieval, and patient-estimation initiatives, partnering with executives, product, operations, engineering, and business development from discovery and requirements through prototyping, validation, UAT, and handoff.
- Designed and hardened ImagineOne's natural-language RCM reporting capability around a 79-question business test catalog and 10+ governed reporting sources, combining intent routing, schema validation, stored-procedure alignment, semantic clarification, and SQL-based analytics execution.
- Built validation harnesses against official reports and stored procedures and drove 4 formal accuracy-hardening rounds, resolving payer normalization, date logic, aggregation, join, alias, ambiguity, and business-rule defects before expanded rollout.
- Built and deployed a weekly AWS Lambda/EventBridge knowledge pipeline that ingested MadCap/GitHub documentation, parsed site structure, generated retrieval-ready content, synchronized OpenAI vector stores, and maintained S3 state for continuously refreshed knowledge access.
- Built a multimodal medical-document workflow for variable-layout PDFs, handwriting, checkboxes, and circled values, producing structured downstream data with validation and human-review controls; supported a radiology client opportunity associated with a $60K enterprise software sale.
- Defined and refined a patient billing estimation workflow combining EDI 271 eligibility data, payer fee schedules, chargemaster data, CPT/HCPCS matching, and structured rule evaluation to support real-time, audit-friendly out-of-pocket estimates.

Brooksource @ Ally Financial — Feb 2024 – Sep 2024

Technical Release Coordinator — *Charlotte, NC*

- Coordinated enterprise release governance across 15+ engineering teams, aligning technical leads, Scrum Masters, release management, and business stakeholders while maintaining 98% on-time execution.
- Managed release readiness, cross-functional dependencies, operational risk, scope alignment, and stakeholder communication across concurrent digital sprint releases.
- Improved delivery visibility through Jira, ServiceNow, and Confluence reporting and standardized release procedures that reduced preparation time by 15%.

Domtar — May 2023 – Aug 2023

Test Automation Engineer Intern — *Charlotte, NC*

- Automated SAP ERP validation workflows using Tricentis TOSCA and SQL Server, reducing enterprise testing cycle time by 30%.
- Identified, documented, and escalated defects and operational risks to strengthen quality controls and release readiness across enterprise systems.

Army National Guard — Mar 2019 – Feb 2021

Combat Medic — *Charlotte, NC*

- Managed medical documentation, operational coordination, and team communication in high-pressure environments, developing disciplined execution and healthcare workflow experience.

Education

University of North Carolina at Charlotte — Dec 2023

B.S.B.A. in Management Information Systems — GPA: 3.92 — *Charlotte, NC*

Scrum Alliance — Aug 2026

Certified Scrum Product Owner (CSPO) — *Charlotte, NC*

Core Skills

- **Product Analysis & Business Systems:** Product Discovery, Stakeholder Interviews, Requirements Gathering, Process Mapping, Workflow Analysis, User Stories, Acceptance Criteria, UAT, Prioritization, Business Process Improvement
- **Delivery & Product Operations:** Cross-Functional Coordination, Release Governance, Dependency Management, Risk & Tradeoff Analysis, KPI Validation, Agile/Scrum, Jira, Confluence, ServiceNow
- **Technical Systems Leverage:** SQL/T-SQL, C#/.NET, Python, AWS Lambda, S3, EventBridge, API Gateway, OpenAI Responses API, RAG/Vector Search, OCR/Document Intelligence, EDI 271, Healthcare RCM
