Professional Summary

Software developer with experience building business applications, API integrations, and cloud-based workflows using C#/.NET, SQL/T-SQL, Python, JSON, and AWS Lambda. Skilled in translating business needs into technical requirements, validating application behavior, debugging, documenting changes, and coordinating across technical and business teams. BSBA in Management Information Systems with a Full-Stack Development Certificate from UNC Charlotte.

Technical Skills

Languages & Data: C#, SQL/T-SQL, Python, JavaScript, TypeScript, GraphQL, JSON
Applications & Integrations: .NET, WinUI, React, Next.js, REST APIs, OpenAI APIs, AWS Lambda, API Gateway, S3, IAM
Quality & Delivery: Git, application testing and debugging, data validation, test automation, technical documentation, requirements analysis, SDLC, release coordination

Relevant Professional Experience

ImagineSoftware **Mar 2025 – May 2026**
AI Specialist *Charlotte, NC*

- Developed a natural-language RCM reporting application using C#, WinUI, .NET, OpenAI APIs, and T-SQL to translate business questions into reporting queries and database results.
- Built and deployed an AWS Lambda knowledge-sync pipeline to ingest enterprise documentation, prepare retrieval content, synchronize an OpenAI vector store, maintain S3 state, and run on an Amazon EventBridge schedule.
- Worked on API-based application integrations using structured JSON data and AWS services, including API Gateway, Lambda, and S3; coordinated with AWS administrators on IAM policies and application access requirements.
- Developed a multimodal healthcare document-intelligence workflow for variable-layout forms, handwriting, checkboxes, and structured field extraction, supporting a radiology initiative associated with a $60K enterprise software sale.
- Validated reporting against 79 representative RCM business questions spanning collections, A/R, denials, refunds, payer performance, productivity, and report discovery through four formal validation rounds against existing reporting logic and stored procedures.
- Partnered with business users and technical teams to gather requirements, demonstrate prototypes, test workflows, debug issues, evaluate tradeoffs, document changes, and support handoff.

Brooksource at Ally Financial **Feb 2024 – Sep 2024**
Technical Release Coordinator *Charlotte, NC*

- Coordinated release readiness across 15+ engineering teams, tracking dependencies, approvals, implementation status, and production readiness across delivery teams and platforms.
- Communicated delivery status, escalated blockers, clarified ownership, and maintained release documentation to support deployment planning and cross-team handoffs.

Domtar **May 2023 – Aug 2023**
Test Automation Engineer Intern *Charlotte, NC*

- Supported SAP ERP workflows through test automation, workflow analysis, issue identification, and defect documentation; communicated findings to enterprise teams.

Selected Web Projects

Volt Underground: E-commerce application using React, TypeScript, MongoDB, and Apollo GraphQL, with shopping-cart and checkout workflows and Cypress testing.

HiPub: Conversational discovery application integrating the OpenAI API, LangChain.js, Google Places, PostgreSQL, and JWT authentication.

Additional Experience

Magri Exterior Services — Owner / Field Operations Lead Jul 2026 – Present
Manage customer communication, scheduling, pricing, equipment readiness, and exterior-cleaning service delivery.

Education

University of North Carolina at Charlotte **Dec 2023**
BSBA, Management Information Systems *Charlotte, NC*

University of North Carolina at Charlotte **Dec 2024**
Full-Stack Development Certificate *Charlotte, NC*

Certification & Military Service

Certification: Certified Scrum Product Owner (CSPO), Scrum Alliance Aug 2026

Military Service: Army National Guard, Combat Medic Mar 2019 – Feb 2021
